General Information

Quiz Arrangement

- 4th, 7th, 11th, 15th week
- Quiz length: 50 minutes

Homework

- Deadline: Every Mon 18:30
- All homework last week

Midterm

Time: Nov 8th 10:00-12:00 a.m.

Review

- 1. Probability Theory
 - A branch of Mathematics.
 - Take it as a mathematical model of chance phenomenon. (Motivation)
- 2. Probability Space
 - A probability space is a triple (Ω, \mathcal{F}, P) .
 - Ω : Sample space. (The **set** of all possible outcomes.)
 - \mathcal{F} : Event space. (A **collection** of some **subsets** of Ω .) (' σ -field').
 - P: Probability measure. (Defined on \mathcal{F}).

Review

3. Set/Event Operation

- Communicative Law: $A \cap B = B \cap A$, $A \cup B = B \cup A$.
- Associative Law: $A \cap (B \cap C) = (A \cap B) \cap C$, $A \cup (B \cup C) = (A \cup B) \cup C$. (Hence, $A \cap B \cap C$ and $A \cup B \cup C$ are well-defined.)
- Distributive Law: $A \cap (B \cup C) = (A \cap B) \cup (A \cap C)$, $A \cup (B \cap C) = (A \cup B) \cap (A \cup C)$.
- De Morgan's Law: $\overline{A \cup B} = \overline{A} \cap \overline{B}$, $\overline{A \cap B} = \overline{A} \cup \overline{B}$. (Then, we have $\bigcup_{i=1}^{n} A_i = \bigcap_{i=1}^{n} \overline{A_i}$ and $\bigcap_{i=1}^{n} A_i = \bigcup_{i=1}^{n} \overline{A_i}$.)
- $A = B \iff A \subset B, B \subset A$.
- $A \subset B \iff$ For any $x \in A$, we have $x \in B$.
- $A B = A \cap \overline{B}$ and $(A B) \cup B = A \cup B$.

Review

- 4. Definition of Probability Measure P in (Ω, \mathcal{F}, P)
 - $P: \mathcal{F} \to [0,1]$.
 - $P(\Omega) = 1$.
 - $P(\bigcup_{i=1}^{\infty} A_i) = \sum_{i=1}^{\infty} P(A_i)$, where $A_i \cap A_j = \emptyset$, for any $i \neq j$. (Countable Additivity)
- 5. Countable Additivity and Finite Additivity.
 - $P(\bigcup_{i=1}^{N} A_i) = \sum_{i=1}^{N} P(A_i)$, where $A_i \cap A_j = \emptyset$, for any $i \neq j$. (Finite Additivity)
 - Countable Additivity implies Finite Additivity.

Homework

P20, 5

Let A and B be arbitrary events. Let C be the event that either A occurs or B occurs, but not both. Express C in terms of A and B using any of the basic operations of union, intersection, and complement.

Solution

We have $\{A \text{ or } B \text{ occurs}\} = A \cup B \text{ and } \{B \text{ oth } A \text{ and } B \text{ occur}\} = A \cap B$. Then, $C = (A \cup B) \cap \overline{(A \cap B)}$.

Homework

P20. 6

Two six-sided dice are thrown sequentially, and the face values that come up are recorded.

- a. List the sample space.
- b. List the elements that make up the following events: (1) A = the sum of the two values is at least 5, (2) B = the value of the first die is higher than the value of the second, (3) C = the first value is 4.
- c. List the elements of the following events: (1) $A \cap C$, (2) $B \cup C$, (3) $A \cap (B \cup C)$.

- (1) 撒三枚硬币;
- (2) 推三颗极子;
- (3) 连续抛一枚硬币,直至出现正面为止;
- (4)口袋中有黑,白、红球各一个,从中任取两个球;先从中取出一个,放到 后再取出一个。
- (5)口袋中有果、白、红球各一个、从中任取两个球;先从中取出一个、不敢 回后再取出一个。

Solution

解 (1) $\Omega = \{(0,0,0),(0,0,1),(0,1,0),(1,0,0),(0,1,1),(1,0,1),(1,1,0),(1,1,1)\}$,共含有 $2^3 = 8$ 个样本点,其中 0 表示反演,1 表示正面 (3) 中的 0 与 1 也是此意.

 - A,B,C都发生或都不发生;
 - (2) A,B,C 中不多于一个发生;
 - (3) A,B,C 中不多于两个发生;
 - (4) A,B,C 中至少有两个发生.

Solution

解 (1) $ABC \cup ABC$.

- (2) $\overrightarrow{A} \overrightarrow{B} \overrightarrow{C} \cup \overrightarrow{A} \overrightarrow{B} \overrightarrow{C} \cup \overrightarrow{A} \overrightarrow{B} \overrightarrow{C} \cup \overrightarrow{A} \overrightarrow{B} \overrightarrow{C}$.
- (3) $\Omega ABC = ABC = A \cup B \cup C$.
 - (4) $AB \cup AC \cup BC$.

Exercise 3

设随机事件A,B满足条件AB = ĀB. 试求A∪B.

Solution

Since $A \cap \underline{B} = \overline{A} \cap \overline{B}$, then we have $\overline{A} \cap \overline{B} = A \cap B \cap \overline{B} = \emptyset$. Hence, $A \cup B = (\overline{A} \cap \overline{B}) = \overline{\emptyset} = \Omega$.

Exercise 4

2. 试把事件 $A_1 \cup A_2 \cup \Lambda \cup A_n$ 表示成n 个两两互不相容事件之并。n

Solution

Let
$$B_1 = A_1$$
 and $B_k = A_k - \bigcup_{i=1}^{k-1} A_i$ for $k = 2, ..., n$. Then, we will prove the following by induction: $\bigcup_{i=1}^{k} B_i = \bigcup_{i=1}^{k} A_i$, for $k = 1, ..., n$.

First, we have $B_1 = A_1$.

Then, assume we have $\bigcup_{i=1}^k B_i = \bigcup_{i=1}^k A_i$, then we consider $\bigcup_{i=1}^{k+1} B_i$. We have

$$\bigcup_{i=1}^{k+1} B_i = B_{k+1} \cup (\bigcup_{i=1}^k B_i) = (A_{k+1} - \bigcup_{i=1}^k A_i) \cup (\bigcup_{i=1}^k A_i) = \bigcup_{i=1}^{i=1} A_i.$$

Hence, by induction, we have $\bigcup_{i=1}^{n} B_i = \bigcup_{i=1}^{n} A_i$.

Now we need to prove $B_i \cap B_j = \emptyset$, for $i \neq j$.

Assume i < j, then we have

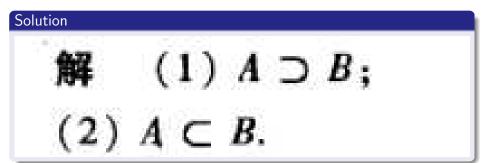

$$B_i \cap B_j = B_i \cap (A_j - \bigcup_{l=1}^{j-1} A_l) = B_i \cap (A_j - \bigcup_{l=1}^{j-1} B_l) = \emptyset.$$

Exercise 5

4. 指出下列事件等式成立的条件.

(1)
$$A \cup B = A$$
;

(2)
$$AB = A$$
.

Exercise 6

- 设 X 为随机变量,其样本空间为 Ω = [0 ≤ X ≤ 2],记事件 A = [0.5 < X ≤
- 1 , B = |0.25 ≤ X < 1.5 , 写出下列各事件;

- (1) \overline{AB} ; (2) $\overline{A} \cup B$; (3) \overline{AB} ; (4) $\overline{A} \cup \overline{B}$.

Solution

(1)
$$\overrightarrow{AB} = (|0 \le X \le 0.5| \cup |1 < X \le 2|) \cap |0.25 \le X < 1.5|$$

= $|0.25 \le X \le 0.5| \cup |1 < X < 1.5|$.

- (2) $A \cup B = |0 \le x \le 2| = \Omega$.
- (3) 由于A C B, 所以AB = A. 故

$$\overline{AB} = \overline{A} = |0 \le X \le 0.5| \cup |1 < X \le 2|.$$

(4) 由于A ⊂ B,所以A ∪ B = B,故

$$A \cup B = B = |0 \le X < 0.25| \cup |1.5 \le X \le 2|$$
.
